CAREER OBJECTIVE

Proven .NET Developer with 4-year Computer Science degree and 5+ years experience. As a dedicated problem solver, I have focused on developing simple & efficient code to solve complex problems. Through my time at Clarity & Anovaa, I have gained hands-on development experience using C# and .NET and remain motivated to expanding my skill set.

WORK EXPERIENCE

Software Developer

Clarity Ventures

📅 January 2023 - June 2023

📍 Austin, TX

- Responsible for designing and implementing new features and client customizations for Clarity's eCommerce platform.
- Completed several large 3rd party integration projects including Paya payment processing, the National Weather Service, and HautAI.
- Designed and built a brand new platform AI Provider including an integration with ChatGPT for generating client product details and images.
- Led multiple training sessions with the development team focused on various parts of the core platform.

Software Developer

Anovaa

📅 January 2019 - August 2022

📍 Malvern, PA

- Joined the Web Content Publishing Team to customize and enhance 2 client websites and 3 corresponding loan origination microsites.
- Modernized 100+ pages of the Citizens Bank loan origination website.
- Promoted to full-stack position and selected to join Anovaa's original Platform team from pool of existing client Application development teams.
- Designed and implemented a new process to reduce development time of client agnostic UI layout changes by 66%.
